

ENVIRONMENTAL SUSTAINABILITY

Panagiota Michael All

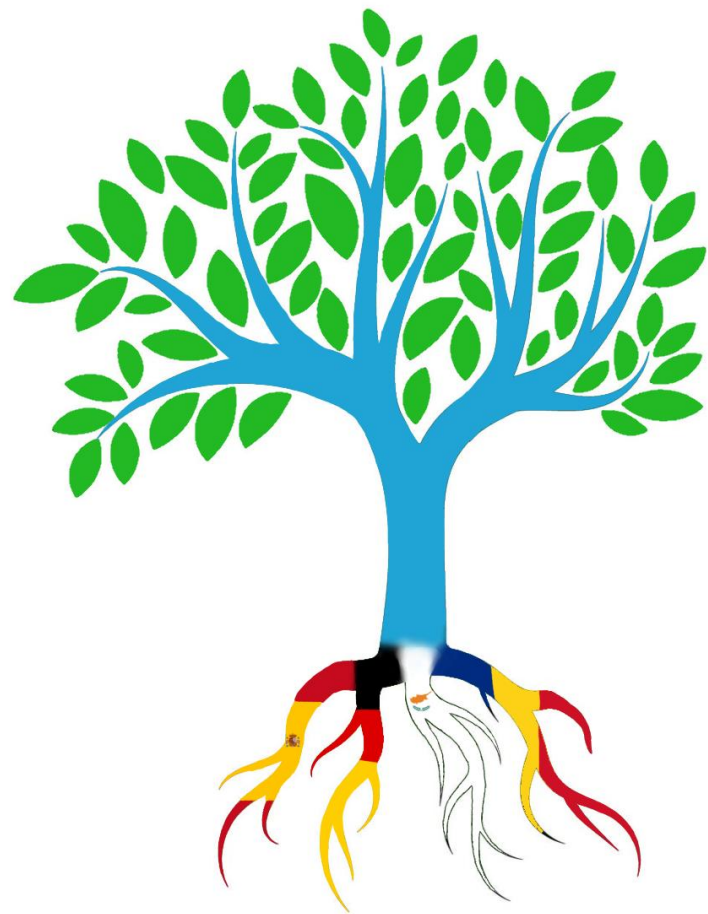

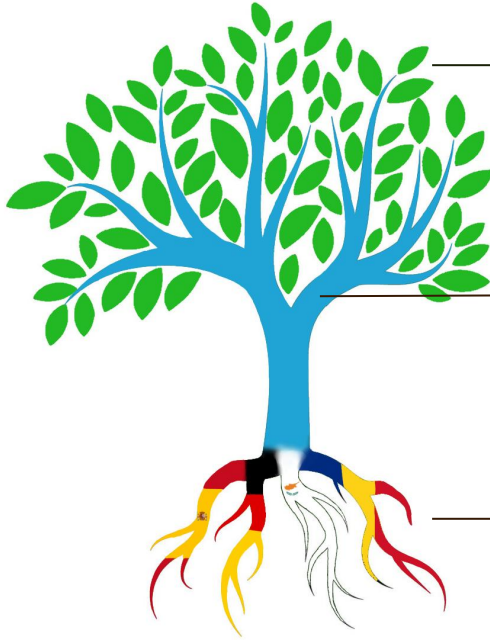

- **Nature's hand giving us life**
- **Human hand that ought to help keep the environment safe**

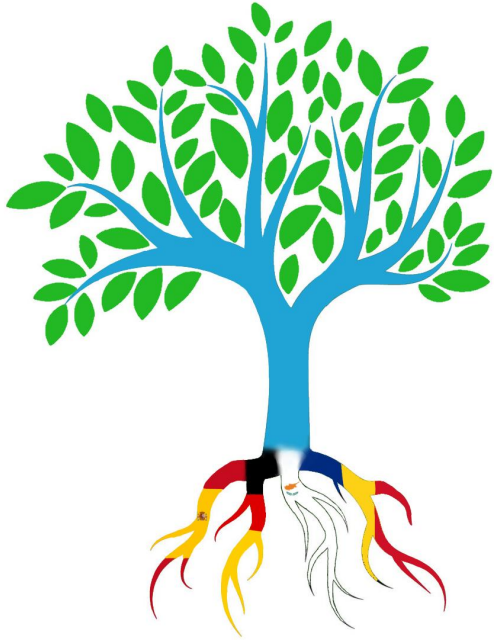

We can all combine our hands in order to protect the environment and to be able to live in a better world

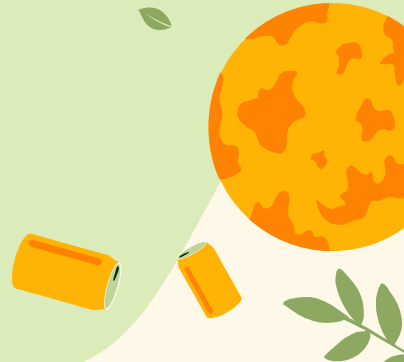

- **The green leaves represent the environment**
- **The trunk of the tree is blue for water – bridge that unites humanity with the environment**
- **The flags that not only symbolize the representative countries but the whole world as one**

It's our responsibility to maintain an eco-friendly balance in the natural environment of our planet and its natural resources that help us survive

**People do not need to speak the
same language in order to
understand each other,
sometimes the same dreams, the
same achievements can bring
them together. To protect the
environment is another form of
bonding.**

Thank you
